

MeraRAW — UI / UX Interactive Element Inventory

Audience: Figma Pro intern recreating / refining the editor UI

Source of truth: live React UI in `src/` (verified against code + Develop screenshot)

Date: 2026-07-13

How to use this in Figma

- Treat each row as a **component** (or component variant).
- Column **Type** → Figma component kind (Button, Icon button, Slider, etc.).
- Column **Category** → organize frames / pages (Navigation, Edit adjust, ...).
- Column **States to design** → variants you should include (default / hover / active / disabled / selected).
- Prefer **Lightroom-classic density**: small type, dark chrome, subtle active states (white text, blue selection, white border on swatches).

Shared patterns (design once, reuse everywhere)

Pattern	Type	Behavior	States to design
Panel header + chevron	Chevron collapse	Expands / collapses a section	Expanded, collapsed
Param slider row	Label + range slider + value field	Scrub live; click value to type; double-click label resets	Default, dragging, editing value, disabled
Tab (top / rail)	Text or icon tab	Switches module or right-rail panel	Default, hover, active, disabled
List / tree row	Selectable row	Opens / filters / selects	Default, hover, selected
Thumbnail	Image button	Select / open image	Default, selected (blue border), hover
Modal	Dialog + backdrop	Backdrop click usually closes	Open, busy/disabled primary
Chip / swatch	Toggle chip	Selects a filter or hue band	Default, selected (white border)
Icon button	Compact control	Tool toggle or one-shot action	Default, hover, active/on, disabled

1. Top navigation

Label / icon	Type	What it does	Category	States to design
Logo + MeraRAW + BETA badge	Brand mark (non-interactive)	Product identity	Brand	—
Library	Tab	Switch to Library module	Navigation	Default, active
Develop	Tab	Switch to Develop (disabled until an image is open)	Navigation	Default, active, disabled
Education	Tab	Switch to Education / guides	Navigation	Default, active
Open...	Button	Native file picker → open one image	File I/O	Default, hover

Export... (+ upload icon)	Button	Open Export dialog (disabled until image open)	Export	Default, hover, disabled
----------------------------------	--------	--	--------	--------------------------

2. Left sidebar (Develop)

Navigator

Label / icon	Type	What it does	Category	States to design
Navigator header + chevron	Chevron collapse	Show / hide navigator	Navigation	Expanded, collapsed
Mini preview thumbnail	Clickable canvas	Click → fit image in viewport	View / zoom	Default, hover

Snapshots

Label / icon	Type	What it does	Category	States to design
Snapshots header + chevron	Chevron collapse	Show / hide snapshots	History	Expanded, collapsed
"No snapshots."	Empty state text	Placeholder when list empty	History	—
Snapshot name row	List item button	Restore that snapshot	History	Default, hover, selected
snapshot name...	Text input	Type name for new snapshot	History	Default, focus
+ (or Enter in field)	Icon button / submit	Create snapshot from current edit	History	Default, hover, disabled

History

Label / icon	Type	What it does	Category	States to design
History header + chevron	Chevron collapse	Show / hide history list	History	Expanded, collapsed
"No edits yet." / history rows	Read-only list	Shows edit steps (not clickable undo targets in UI)	History	—

Local file browser

Label / icon	Type	What it does	Category	States to design
LOCAL / Browse section	Section header	Local disk browsing	Catalog / files	—
Browse... / ...	Button / icon button	Pick another folder to browse	File I/O	Default, hover
Folder row + ▸/▾ chevron	Tree row + collapse	Expand / collapse folder	Catalog / files	Collapsed, expanded, hover
File row (e.g. _DSC4843.ARW) + green file icon	Tree file row	Open that file in Develop	File I/O	Default, hover, selected (blue)

3. Center viewport (Develop)

Label / icon	Type	What it does	Category	States to design
Main image canvas	Drag / scroll / double-click surface	Pan (drag), zoom (wheel), double-click toggles fit ↔ 1:1	View / zoom	Default, panning, WB-sample cursor, brush cursor
Canvas (WB eyedropper on)	Click target	Sample neutral point → set white balance	Edit adjust	Crosshair / pipette cursor
Canvas (Brush mask on)	Paint surface	Paint into brush mask	Masking	Brush cursor
Crop frame + 8 handles	Overlay + handles	Move / resize crop (when Crop tool active)	Crop	Idle, dragging, handle hover
Outside crop drag	Rotate gesture	Rotate crop angle	Crop	Rotating
⌘/Ctrl + drag inside crop	Straighten gesture	Draw straighten line	Crop	Drawing

Viewport chrome (bottom of preview)

Label / icon	Type	What it does	Category	States to design
Fit / frame icon	Icon button	Fit image to viewport	View / zoom	Default, hover, active
1:1	Button	Actual-pixels zoom	View / zoom	Default, hover, active
– / +	Buttons	Zoom out / in	View / zoom	Default, hover, disabled at limits
Zoom % readout	Label (sometimes editable pattern)	Shows current zoom	View / zoom	—
Zoom slider (if shown)	Range slider	Continuous magnification	View / zoom	Default, dragging

Screenshot also shows fit / 1:1 / ± near the image; the **look toggles** and Before/After live on the bottom toolbar (next section).

4. Bottom toolbar + filmstrip (Develop)

Look / compare toolbar

Label / icon	Type	What it does	Category	States to design
Neutral	Toggle	Flat scene-referred display	View / look	Default, active
Camera	Toggle	Punchy camera / JPEG-like look	View / look	Default, active
Filmic	Toggle	AgX filmic rolloff	View / look	Default, active
Original	Toggle	Demosaiced sensor, no camera profile look	View / look	Default, active
Before/After (+ split icon)	Toggle	Bypass edits for compare	View / compare	Off, on
Loupe / magnifier	Icon button	Jump to 1:1	View / zoom	Default, hover

Filmstrip

Label / icon	Type	What it does	Category	States to design
Filmstrip thumbnail	Thumbnail	Open sibling image in folder	Catalog / files	Default, hover, selected (blue border)
Filmstrip scroll	Scroll container	Browse siblings	Catalog / files	—

Always-on chrome

Label / icon	Type	What it does	Category	States to design
Report a problem (speech bubble)	FAB / button	Opens feedback modal	Feedback	Default, hover
Status bar (ready · GPU · ARW badge · EXIF · export msg)	Read-only bar	System + file metadata	Status	ready / error variants

5. Right tool rail (vertical icons)

Label / icon	Type	What it does	Category	States to design
Presets (circle cluster)	Icon tab	Show Presets panel	Navigation	Default, active
Edit (slider bars)	Icon tab	Show Edit panel (default)	Navigation	Default, active
Crop	Icon tab	Show Crop panel + crop tool	Navigation	Default, active
Remove (eraser)	Icon tab	Spot removal (placeholder / coming soon)	Navigation	Default, active
Masking (dashed circle)	Icon tab	Show Masking panel	Navigation	Default, active

6. Edit panel (right — default Develop view)

Header

Label / icon	Type	What it does	Category	States to design
Edit title	Panel title	—	Navigation	—
Auto	Button	Auto-tone from image stats	Edit adjust	Default, hover, busy
B&W	Button	Convert to black & white	Edit adjust	Default, hover, active

Histogram

Label / icon	Type	What it does	Category	States to design
Histogram graph	Display (mostly non-interactive)	Shows tonal distribution	Edit adjust	—
Clipping triangles (if present)	Icon toggles	Show highlight / shadow clipping overlays	View / overlay	Off, on

AI Color Grader (collapsible)

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Look chips (Warmer, Cooler, Teal & orange, ...)	Chip buttons	Run AI with preset prompt	AI edit	Default, hover, busy
Describe the look...	Text input	Custom AI prompt	AI edit	Default, focus
Apply (sparkles)	Icon button	Run typed prompt	AI edit	Default, hover, disabled
Auto (wand)	Button	Fully automatic AI grade	AI edit	Default, hover, busy
Explain	Button	AI diagnosis only (no edits)	AI edit	Default, hover
Keep / Revert	Buttons	Accept or undo AI pass	History	Default, hover
Before/After (in AI review)	Toggle	Compare during AI review	View / compare	Off, on

Profile

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Profile dropdown (e.g. MeraRAW Standard)	Select / dropdown	Switch camera / look profile	Edit adjust	Closed, open, selected option

Demosaic (RAW only)

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Algorithm dropdown	Select	Change demosaic algorithm (re-decodes)	Edit adjust	Closed, open

Light

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Exposure	Slider row	Exposure stops	Edit adjust	Shared slider states
Contrast	Slider row	Contrast	Edit adjust	Shared slider states
Highlights	Slider row	Highlight recovery	Edit adjust	Shared slider states
Shadows	Slider row	Shadow lift	Edit adjust	Shared slider states
Whites	Slider row	White point	Edit adjust	Shared slider states
Blacks	Slider row	Black point	Edit adjust	Shared slider states

White Balance

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Eyedropper	Icon toggle	Activate WB sampler on viewport	Edit adjust	Off, on
Temp	Slider row	Color temperature	Edit adjust	Shared slider states
Tint	Slider row	Green ↔ magenta	Edit adjust	Shared slider states

Color

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Vibrance	Slider row	Smart saturation	Edit adjust	Shared slider states
Saturation	Slider row	Global saturation	Edit adjust	Shared slider states

Tone Curve

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
RGB / R / G / B	Segmented tabs	Active curve channel	Edit adjust	Default, active
Curve canvas	Interactive graph	Add / drag points; right-click menu	Edit adjust	Idle, dragging point
Context: Delete / Reset / Reset All / Flatten	Context menu	Point & curve ops	Edit adjust	Menu open

HSL / Color Mix

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Red → Magenta swatches (8)	Color swatch buttons	Select hue band (Orange = skin)	Edit adjust	Default, selected + label
Hue / Saturation / Luminance	Slider rows	Adjust selected band	Edit adjust	Shared slider states

Split Toning / Color Grading

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Perceptual / Classic / Light	Radio / segmented	Grading model	Edit adjust	Default, active
Shadows / Midtones / Highlights wheels	Color wheels	Drag hue/sat; dbl-click reset	Edit adjust	Idle, dragging

Zone / chroma / range sliders	Slider rows	Fine-tune grade	Edit adjust	Shared slider states
-------------------------------	-------------	-----------------	-------------	----------------------

Look LUT

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Load LUT... / Replace...	Button	Pick .cube file	Edit adjust	Default, hover
Remove	Button	Clear LUT	Edit adjust	Default, hover, disabled if none
Opacity	Slider row	LUT blend	Edit adjust	Shared slider states

Detail

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Luma NR / Chroma NR / Detail Preserve	Slider rows	Noise reduction	Edit adjust	Shared slider states
Sharpen / Radius / Detail	Slider rows	Capture sharpening	Edit adjust	Shared slider states

Calibration (often collapsed)

Label / icon	Type	What it does	Category	States to design
Section chevron	Chevron collapse	Expand / collapse	Navigation	Expanded, collapsed
Red/Green/Blue Hue & Sat + Shadow Tint	Slider rows	Camera calibration	Edit adjust	Shared slider states

Placeholder sections (header only today)

Clarity & Dehaze, Vignette, Optics, Geometry — **chevron + copy only**, no controls yet. Design as empty/disabled panels if you want future slots.

7. Other right-rail panels (not in default screenshot)

Presets

Label / icon	Type	What it does	Category
Search field	Text input	Filter presets / tags	Presets
Tag chips (All, Natural, Moody, ...)	Toggle chips	Filter by tag	Presets
Preset row	List button	Apply preset	Edit adjust
Save preset as...	Text input	Save current look	Presets

Crop panel

Label / icon	Type	What it does	Category
Start crop / Done / Cancel	Buttons	Enter / commit / discard crop	Crop
Aspect lock  / 	Icon toggle	Lock aspect	Crop

Aspect dropdown	Select	As Shot, 1×1, 4×5, 16×9, ...	Crop
Flip aspect ⇌	Icon button	Swap orientation	Crop
Angle	Slider	Straighten	Crop
↺90° / ↻90° / ⇄ / ↴	Buttons	Rotate / flip	Crop
Reset crop	Button	Clear crop module	Crop

Masking

Label / icon	Type	What it does	Category
Brush tool toggle	Icon toggle	Paint mode on viewport	Masking
Subject / Background / Sky	Buttons	AI semantic masks	Masking
Radial / Linear / Brush	Buttons	Manual masks	Masking
Mask list row	Selectable row	Select mask for scoped edits	Masking
👁 / ✕	Icon buttons	Overlay visibility / delete	Masking
Opacity / Feather	Sliders	Mask edge / strength	Masking
Invert	Checkbox	Invert mask	Masking

Remove

Placeholder only — no interactive controls yet.

8. Library module (top tab)

Label / icon	Type	What it does	Category
All Photos / folders / albums	Nav list	Filter catalog	Catalog
+ (albums)	Icon button	Create album	Catalog
+ Add Photos... / Browse...	Buttons	Import flow	File I/O
Rebuild	Button	Rebuild index	Catalog
Search	Text input	Faceted search	Catalog
Sort / rating / flag dropdowns	Selects	Sort & filter	Catalog
blurry / dupes	Checkboxes	Quality filters	Catalog
Grid / Square	Toggle	Grid layout	View
Grid thumbnail	Thumbnail	Select; double-click → Develop	Catalog
Keyword chips + add field	Tags + input	Edit keywords	Catalog
Export N...	Button	Batch export selection	Export
Add to album...	Select	Assign selection	Catalog

Import Review modal

Select all / none, candidate cells (toggle), Cancel, **Import N photos**.

9. Education module

Label / icon	Type	What it does	Category
Guide list items	Nav list	Switch article	Navigation
Previous / Next	Buttons	Browse guides	Navigation
Support development	Link button	Open Early Supporter modal	License / monetization

10. Global modals & overlays

Report a problem

Message textarea, optional email, Cancel, Send, Done; backdrop closes.

Export dialog

Choose folder, Format, Color space, Size, Quality slider (JPEG/HEIC), Sharpen, Strip EXIF checkbox, Copyright, Watermark, Reveal in Finder, Cancel (batch), Close, **Export**.

Settings (opened via menu / shortcut — no top-nav button)

Support Development, View on meratech.co, Close.

Early Supporter

Email / password (optional checkout), Get Lifetime Access, Continue free, Restore purchase, Done.

Keyboard help (⌘+ /)

Backdrop + × close only (content is shortcut reference).

License gate (implemented, not always mounted)

Email, password, Sign in & activate, signup links, Sign out when unlocked.

11. Keyboard-only (no dedicated button — annotate in Figma)

Shortcut family	Examples	Category
Chrome visibility	Tab, F6–F8 hide panels / filmstrip / toolbar	Navigation
Clipping / info overlays	J, I	View / overlay
Fullscreen	Fullscreen toggle	View
Crop overlays	O, Shift+O, H, L	Crop
Library rates / flags	Number keys, flags, select-all	Catalog

Suggested Figma page structure

1. **Foundations** — color, type, spacing, slider / chevron / tab / swatch components
 2. **Chrome** — top nav, status bar, tool rail, filmstrip, report FAB
 3. **Develop — Edit** — full right panel (matches screenshot)
 4. **Develop — Crop / Mask / Presets**
 5. **Library + Import**
 6. **Education**
 7. **Modals** — Export, Settings, Supporter, Report, Keyboard help
 8. **Empty / disabled / placeholder** states (Remove panel, empty snapshots, disabled Develop tab)
-

Notes for the intern

1. **Active language:** white text / underline for tabs; **blue fill** for selected file rows; **blue border** for selected filmstrip thumbs; **white border** for selected HSL swatch.
2. **Density:** this is a tool UI, not a marketing page — keep controls compact.
3. **Don't invent** Remove-tool controls or Clarity/Optics sliders yet — mark as “coming soon” if you draw the slots.
4. Code lives in `src/components/` (especially `1r/`). Screenshot path for reference: Develop → Edit tab with Light + HSL open.
